

ALWAYS AND FOREVER

[verse 1]

You crossed the stormy mountains in the dark of night to me
So we could find if our love was truly meant to be
And I was very grateful and you were very pleased
Lying in each other's arms, we had no more needs

[chorus]

I love you
Always and forever, our love will bring us through
And you love me
Always and forever, our love sets our souls free

[verse 2]

Just as the sea keeps rolling and its waves caress the shore
I keep waiting for you and you keep giving more
Like darkness softly fading beneath the new day's sun
You make my fears disappear saying I'm the one

[chorus]

I love you
Always and forever, our love will bring us through
And you love me
Always and forever, our love sets our souls free

[verse 3]

The love we built between us it can never be undone
The universe might vanish, but we'll go on as one
I love you as my lover, I love you as my friend
We're in love eternally, our love will never end

[chorus]

I love you
Always and forever, our love will bring us through
And you love me
Always and forever, our love sets our souls free

[coda]

Always and forever, always and forever, always and forever
our love, our love, will be
