

MY FOREVER LOVE FOR YOU

[verse 1]

I walk along our street
Can't believe our home sits empty
I feel the deep defeat
And loneliness inside me
[Daneliya run, OMG!]

The days and nights roll by
My whole world cast in darkness
No matter how I try
All I feel is this great sadness

[chorus]

Where are you, did you find what you need
What I couldn't give you, watching your heart leave
Tearing me apart, as I tried oh so hard
To keep our love alive

There will never be another
What we had must see me through
I will feel this way forever
My forever love for you
[Daneliya run, unbelievable!]

[verse 2]

Time heals wounds is what they say
This pain may yet subside
But my love will never go away [alt line: But my love won't go away]
I'll feel you deep inside

[chorus]

Where are you, did you find what you need
What I couldn't give you, watching your heart leave
Tearing me apart, as I tried oh so hard
To keep our love alive

There will never be another
What we had must see me through
I will feel this way forever
My forever love for you

There will never be another
What we had must see me through
I will feel this way, this way
My forever love for you

[coda]

I always will be living, the love I feel for you
No matter what may happen, know this will be true
Should you ever feel despair, I'll be there to help you through

My love will last forever, this love I feel for you
Yes my love will last forever, forever there for you
I will feel this way forever
My forever love for you...
